# RIBAZ HEALTHCARE ACADEMY

Ribaz Group of Institutions is headed by a team of professionals with nearly two decades of experience in providing realistic, value based, professional courses that are both a source of income to students and an act of assistance to the society. The ISO 9001:2015 certified organization is ably headed by some of the best hands in the industry. All care has been taken to train and evolve some of the greatest effective workforce.

We have facilitated employment for ten thousands of candidates in various sectors of the industry in Kerala/India/Overseas. Our social commitment ensures that we offer quality education to the socially and economically backward, and women to create equal opportunities and equal distribution of gainful employment integrating the diverse social fabric.

## VISION

In light of our evolving global landscape and fierce competition, education stands as the cornerstone for sustainable national development. It's crucial to unite efforts towards achieving universal literacy to foster a knowledgeable society and ensure future prosperity.

## MISSION

We empower students to take initiative and responsibility for their present and future learning by developing their academic, interpersonal, intrapersonal and technological skills.

# HEALTH SAFETY & ENVIRONMENT (HSE)

HSE stands for Health, Safety, and Environment. HSE encompasses a range of practices, policies, and regulations to minimize hazards, prevent accidents and injuries, and promote sustainable practices. This approach is vital for safeguarding the health and safety of individuals, protecting the environment, and maintaining sustainable operations across different sectors.

The need for HSE management arose from the dangerous working conditions of earlier eras, particularly in the manufacturing industry, where employees lacked adequate protection from the machinery and equipment they worked with. This led to a high rate of accidents resulting in injuries and even death.

Over time, workers demanded better safety measures, prompting governments to introduce legislation requiring employers to ensure workplace health and safety, pay for medical insurance, and provide compensation for work-related injuries, illness, and death. The primary goal of HSE management is to create a culture of safety by continuously assessing risks, implementing controls, and improving Health, Safety and Environment performance to prevent harm to people and the environment.

# HSE DIPLOMA COURSES

Health, Safety, and Environment (HSE) qualifications are certifications designed to provide individuals with the knowledge, skills, and competencies required to manage health, safety, and environmental issues in the workplace. HSE qualifications are typically offered by accredited training providers and can range from basic awareness-level courses to advanced diplomas.

The primary purpose of HSE qualifications is to help individuals and organizations ensure that their workplaces are safe and healthy for employees and the environment. The qualifications cover various topics, including risk assessment, hazard identification, emergency response planning, environmental management, and occupational health and safety legislation.

## JOB OPPORTUNITIES

# PLACEMENT SUPPORT

Our placement cell co-ordinates with our students and recruiters, to liaison with industry giants and employers in Kerala, India, and overseas to place the right candidate in the right job.
